

Vigilancia de las concentraciones de actividad de sustancias radiactivas en el aire en el lugar de trabajo de instalaciones nucleares (ISO 16639:2017) (Ratificada por la Asociación Española de Normalización en julio de 2019.)

UNE-EN ISO 16639:2019

Vigilancia de las concentraciones de actividad de sustancias radiactivas en el aire en el lugar de trabajo de instalaciones nucleares (ISO 16639:2017) (Ratificada por la Asociación Española de Normalización en julio de 2019.)

Surveillance of the activity concentrations of airborne radioactive substances in the workplace of nuclear facilities (ISO 16639:2017) (Endorsed by Asociación Española de Normalización in July of 2019.)

Surveillance de l'activité volumique des substances radioactives dans l'air des lieux de travail des installations nucléaires (ISO 16639:2017) (Entérinée par l'Asociación Española de Normalización en juillet 2019.)

En cumplimiento del punto 11.2.5.4 de las Reglas Internas de CEN/CENELEC Parte 2, se ha otorgado el rango de documento normativo español UNE al documento normativo europeo EN ISO 16639:2019 (Fecha de disponibilidad 2019-06-12)

Este documento está disponible en los idiomas oficiales de CEN/CENELEC/ETSI.

Este anuncio causará efecto a partir del primer día del mes siguiente al de su publicación en la revista UNE.

La correspondiente versión oficial de este documento se encuentra disponible en la Asociación Española de Normalización (Génova 6 28004 MADRID, www.une.org).

Las observaciones a este documento han de dirigirse a:

EUROPEAN STANDARD

EN ISO 16639

NORME EUROPÉENNE

EUROPÄISCHE NORM

June 2019

ICS 13.280

English Version

Surveillance of the activity concentrations of airborne radioactive substances in the workplace of nuclear facilities (ISO 16639:2017)

Surveillance de l'activité volumique des substances radioactives dans l'air des lieux de travail des installations nucléaires (ISO 16639:2017)

Überwachung der Aktivitätskonzentrationen von luftgetragenen radioaktiven Substanzen an Arbeitsplätzen kerntechnischer Einrichtungen (ISO 16639:2017)

This European Standard was approved by CEN on 8 March 2019.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

| Annex A | (informative) Examples for the determination of uncertainty, decision threshold and detection limit according to ISO 11929..... | 20 |
| Annex B | (informative) Correcting for the interference of radon progeny..... | 27 |
| Annex C | (informative) Normalized concentration and exposure..... | 29 |
| Annex D | (informative) Example applications of evaluating sampling program sensitivity from the viewpoint of potential missed exposure..... | 30 |
| Bibliography | | 32 |

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

The committee responsible for this document is ISO/TC 85, *Nuclear energy, nuclear technologies, and radiological protection*, Subcommittee SC 2, *Radiological protection*.
